Emerging Technologies and Work-Integrated Learning Experiences in Allied Health Education Singh, Indu,Raghuvanshi, Karun,2018-01-15 The Internet serves as an essential tool in promoting health awareness through the circulation of important research among the medical professional community. While digital tools and technologies have greatly improved healthcare, challenges are still prevalent among diverse populations worldwide. Emerging Technologies and Work-Integrated Learning Experiences in Allied Health Education is a critical scholarly resource that examines constructivist teaching methods and active learning strategies in allied health education to enhance student knowledge and prepare them for the digital age. Featuring coverage on a broad range of topics, such as e-learning, microscopic morphology, and virtual reality, this book is geared towards researchers, academicians, medical professionals, and upper level students interested in the advancement and dissemination of medical knowledge.

Problem-Based Learning in a Health Sciences Curriculum Christine Alavi,2002-09-11 Problem-based learning places the student at the centre of a process which integrates what is learned in a lecture with what the student actually experiences in practice. The authors of this book use their experience of designing and implementing such a course to offer detailed examples of strategies that work, and show how the approach can be adapted to individual curriculum needs. Including key chapters on facilitation, clinical practice, assessment and evaluation, Problem-Based Learning in a Health Sciences Curriculum will be inspiring reading for all those who want to explore and extend their teaching methods and motivate their students to acquire real knowledge with enjoyment.

Augmenting Health and Social Care Students' Clinical Learning Experiences Stephen Billett,Jennifer Newton,Gary Rogers,Christy Noble,2019-02-25 This edited volume offers a range of insights about, practices of and findings associated with enriching health and social care students' learning by their engagement in educational processes during and after the completion of their practicum experiences in health and social care settings. That is, using post-practicum intervention to augment and enrich those learning experiences. The collected contributions here draw on the processes of trialing and evaluating educational processes that aimed to enrich those practicum experiences for purposes of improving students' understandings, abilities to address patients' needs, and health and social care related dispositions. These processes and findings from these processes across medical, nursing, midwifery, physiotherapy, pharmacy, exercise physiology, dietetic and

speech pathology education speak directly to educators in both clinical and educational settings in the health and social care sectors. These messages, which arise from educators and clinicians enacting and evaluating these interventions, offer practical suggestions as well as conceptual advances. The reach of the accounts of processes, findings and evaluations is not restricted to this sector alone, however. The lessons provided through this edited volume are intended to inform how post-practicum interventions might be enacted across a range of occupational fields.

Advanced Methodologies and Technologies in Medicine and Healthcare Khosrow-Pour, D.B.A., Mehdi, 2018-10-05
Advancements in medical and healthcare technologies pave the way to improving treatments and diagnoses while also streamlining processes to ensure the highest quality care is given to patients. In the last few decades, revolutionary technology has radically progressed the healthcare industry by increasing life expectancy and reducing human error. *Advanced Methodologies and Technologies in Medicine and Healthcare* provides emerging research on bioinformatics, medical ethics, and clinical science in modern applications and settings. While highlighting the challenges medical practitioners and healthcare professionals face when treating patients and striving to optimize their processes, the book shows how revolutionary technologies and methods are vastly improving how healthcare is implemented globally. This book is an important resource for medical researchers, healthcare administrators, doctors, nurses, biomedical engineers, and students looking for comprehensive research on the advancements in healthcare technologies.

Exploring the Pressures of Medical Education From a Mental Health and Wellness Perspective Smith, Christina Ramirez, 2017-10-31
Discussions surrounding mental health are becoming more prominent and these conditions are becoming less stigmatized. Studying the effects that mental wellness has on students within the medical field can provide an insider perspective on this critical topic. *Exploring the Pressures of Medical Education From a Mental Health and Wellness Perspective* is a critical reference source that examines the mental and emotional problems that arise with students practicing in the medical field. Featuring relevant topics such as student burnout, cognitive learning, graduate education, and curriculum development, this scholarly publication is ideal for medical practitioners, academicians, students, and researchers that are interested in staying apprised of the latest trends and developments relating to mental wellness.

Encyclopedia of Information Science and Technology, Fourth Edition Khosrow-Pour, D.B.A., Mehdi, 2017-06-20
In recent years, our world has experienced a profound shift and progression in available computing and knowledge sharing innovations. These emerging advancements have developed at a rapid pace, disseminating into and affecting numerous aspects of contemporary society. This has created a pivotal need for an innovative compendium encompassing the latest trends, concepts, and issues surrounding this relevant discipline area. During the past 15 years, the *Encyclopedia of Information Science and Technology* has become recognized as one of the landmark sources of the latest knowledge and discoveries in this discipline. The *Encyclopedia of Information Science and Technology, Fourth Edition* is a 10-volume set

which includes 705 original and previously unpublished research articles covering a full range of perspectives, applications, and techniques contributed by thousands of experts and researchers from around the globe. This authoritative encyclopedia is an all-encompassing, well-established reference source that is ideally designed to disseminate the most forward-thinking and diverse research findings. With critical perspectives on the impact of information science management and new technologies in modern settings, including but not limited to computer science, education, healthcare, government, engineering, business, and natural and physical sciences, it is a pivotal and relevant source of knowledge that will benefit every professional within the field of information science and technology and is an invaluable addition to every academic and corporate library.

Public Health Pranee Liamputtong, 2019-05-16 Provides students with an overview of Australian and international public health issues and contexts.

Independent Review of the Public Health Education and Research Program Terry Nolan, 1999

Settlements at the Edge Andrew Taylor, Dean B. Carson, Prescott C. Ensign, Lee Huskey, Rasmus Ole

Rasmussen, 2016-09-30 Settlements at the Edge examines the evolution, characteristics, functions and shifting economic basis of settlements in sparsely populated areas of developed nations. With a focus on demographic change, the book features theoretical and applied cases which explore the interface between demography, economy, well-being and the environment. This book offers a comprehensive and insightful knowledge base for understanding the role of population in shaping the development and histories of northern sparsely populated areas of developed nations including Alaska (USA), Australia, Canada, Greenland, Norway, Russia, Sweden, Finland and other nations with territories within the Arctic Circle.

Frontiers in Developmental and Life-Course Criminology Catia Malvaso, Tara Renae McGee, Ross Homel, 2023-11-24

Frontiers in Developmental and Life-Course Criminology advances the field of developmental and life-course criminology (DLC) by highlighting some recent methodological innovations, and exploring the ways in which DLC criminologists are helping to bridge the gap between science and service by their engagement with policymakers and government and non-government agencies. The book is united by three related themes: the use of new data sources including government administrative data systems, the development of intervention and prevention strategies grounded in DLC research, and resilience, prosocial behaviour, and strengths-based approaches. This book opens up new possibilities for the future of DLC research, orienting the DLC field as one that prioritises the achievement of better outcomes for individuals and society.

Fieldwork Experiences in Criminology and Security Studies Antonio M. Díaz-Fernández, Cristina Del-Real, Lorena

Molnar, 2023-12-19 This book compiles the fieldwork experiences of 55 researchers, addressing the challenges, ethical

considerations, and methodologies employed to study 30 diverse populations and phenomena within Criminology and Security Studies. This volume contributes to filling a gap in academic literature by highlighting the often unspoken realities and intricacies of fieldwork. The book is systematically structured into five thematic sections: The Powerful, The Invisible, The Vulnerable, The Violent, and The Cyber. These categories encompass various aspects and dimensions of fieldwork, including managing emotional distress, negotiating access through gatekeepers, ensuring the protection of informants, and exercising discretion in navigating sensitive issues. As a scholarly resource, this book is invaluable for academics, practitioners, and students involved in criminology, security studies, anthropology, sociology, and political science. By offering in-depth reflections and insights, this volume enhances the reader's understanding of the nuances of fieldwork, and informs the development of robust and ethical research practices. Chapters 2, 9 and 11 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Inside Hazardous Technological Systems Kenneth Pettersen Gould, Carl Macrae, 2021-07-19 This book explores the challenges, opportunities, applications, and implications of applying qualitative research to critical questions of research and practice in the field of organizational risk and safety. The book brings together a diverse perspective to explore the practice of conducting qualitative research as well as to debate the quality of research and knowledge, drawing on a range of different perspectives and traditions. It offers novel and innovative developments in data collection and data analysis methods and tools that can be applied to safety, risk, and accident analysis in complex systems. It also will present practical issues associated with data access and empirical research in challenging and high-stakes environments. This book will provide academics, researchers, students, and professionals in the fields of safety, accident analysis, and risk with a broad-range and expert guide to the key issues and debates in the field, as well as a set of exemplary cases and reflective narratives from leading researchers in the field.

Men's Health Equity Derek M. Griffith, Marino Anton Bruce, Roland J. Thorpe, 2019 Worldwide, men have more opportunities, privileges, and power, yet they also have shorter life expectancies than women. Why is this? Why are there stark differences in the burden of disease, quality of life, and length of life amongst men, by race, ethnicity, (dis)ability status, sexual orientation, gender identity, rurality, and national context? Why is this a largely unexplored area of research? Men's Health Equity is the first volume to describe men's health equity as a field of study that emerged from gaps in and between research on men's health and health inequities. This handbook provides a comprehensive review of foundations of the field; summarizes the issues unique to different populations; discusses key frameworks for studying and exploring issues that cut across populations in the United States, Australia, Canada, the United Kingdom, Central America, and South America; and offers strategies for improving the health of key population groups and achieving men's health equity overall. This book systematically explores the underlying causes of these differences, describes the specific challenges faced by particular

groups of men, and offers policy and programmatic strategies to improve the health and well-being of men and pursue men's health equity. Men's Health Equity will be the first collection to present the state of the science in this field, its progress, its breadth, and its future. This book is an invaluable resource for scholars, researchers, students, and professionals interested in men's health equity, men's health, psychology of men's health, gender studies, public health, and global health.

Indigenizing Education Alison Sammel, Susan Whatman, Levon Blue, 2020-05-23 This book provides invaluable guidance for community, school and university-based educators who are evaluating their educational philosophies and practices to support Indigenizing education. The examples from Australia and Canada shared in this book illustrate how Indigenous and non-Indigenous educators have worked together to Indigenize their educational practices, showcasing community empowerment and reconciliation agendas. It also enables beginning educators to gain a meaningful and critical understanding of what Indigenizing education can mean in their own future practice.

Evidence-Based Education in the Health Professions Ted Brown, Brett Williams, 2005-02-01 Evidence-based education is an attempt to find, critique and implement the highest quality research evidence that underpins the education provided to students. This comprehensive book presents concepts key to evidence-based education, learning and teaching, analysing a wide range of allied health professions in depth. It introduces unique, inspirati

Supporting Course and Programme Leaders in Higher Education Jenny Lawrence, Sue Morón-García, Rowena Senior, 2022-03-30 Offering research- and evidence-based approaches that explore the essential components of programme leadership in higher education, this book is designed to define, develop and support the programme leadership role and all those who undertake it. The book is split into three parts, taking into account the three different lenses through which programme leaders and their professional practice and relationships are generally viewed: the institution, the individual and the programme team. Chapters and case studies address key elements crucial to the holistic development of programme leadership and programme leaders. These include: Understanding and developing programme leadership in context Developing organisational structures and processes so programme leaders can thrive Growing programme leaders' educational leadership, team working and communication Crucial reading for programme leaders, as well as academic and educational developers and leaders working across faculties and whole institutions, this text includes contributions from teaching- and research-focused higher education institutions, as well as established and modern college- and university-based providers in both the northern and southern hemispheres.
